Italian pavilion - Friuli Venezia Giulia stand
World Association of Agronomists pavilion
Swiss pavilion
Thailand pavilion

Summer School Geography of Food

Sustainable management in agriculture,
food industry, tourism and hospitality

The main aim of the Summer School is to involve the next generation in the discussion about **sustainability** problems and solutions in the **food system**. Comprehension of the interconnectivity between different fields such as agriculture, consumption, policy, markets, etc. is crucial.

Two other important aims are the **exchange of knowledge and know-how** between universities and countries, as well as the **intercultural exchange**.

By sharing and learning from each other, awareness of **similarities and differences in food production, nutrition and food appreciation** will be raised and a more **conscious consumption** stimulated.

This newly gained knowledge could result in the invention of sustainable solutions, optimisation of existing solutions or other committed activities.

The 2015 edition takes place at the University of Udine

About 30 students are involved, coming from the following universities of **Switzerland, Thailand** and **Italy**:

- > Zurich University of Applied Sciences
Institute of Natural Resource Sciences
- > Khon Kaen University
Faculty of Management Sciences
& Faculty of Agriculture
- > University of Udine
Department of Agricultural and Environmental Science
& Department of Food Science

FOCUS OF THE 2015 EDITION

Tradition, innovation and sustainable food systems:

how can tradition and/or innovation improve the sustainability of food systems?

UNIVERSITY OF UDINE
