#### WHAT IS GIBB?

The Italian Group of Biomembranes and Bioenergetics is a non-profit society aiming at promoting the advancement of studies on biomembranes and bioenergetics by Italian researchers by means of knowledge sharing and scientific collaborations both in Italy and abroad.

The specific competence of the society is the investigation of the biochemistry, biophysics, ultrastructure and function of energy-transducing cellular organelles.

http://www.gibb-be.org/

#### **ANNUAL MEETING**

Each year, the society members organise a scientific meeting in an Italian city or resort. The spirit is to create a friendly atmosphere, in which researchers at any stage of their career feel free to share their results and perspectives. The Annual meeting is a unique opportunity for young researchers to take the stage, since the society gives them the priority.

Annual meeting of the

Italian Group of
Biomembranes and
Bioenergetics (GIBB)

**Udine, 18-20 June 2015** 

## PRELIMINARY PROGRAM

## **INVITED SPEAKERS**

## **INVITED SPEAKERS**

## Thursday 18

**I 5:00** Welcome address (Authorities, GIBB President & The Organizing Committee)

15:15 Plenary lecture

M. Duchen University College London16:30 Oral presentations

19:00 Welcome reception

# Friday 19

9:00 Plenary lecture

F. Bouillaud University of Paris Descartes

10:00 Oral presentations

10:30 Coffee break

II:00 Oral presentations

13:00 Lunch

14:30 Plenary lecture

C. Indiveri University of Calabria

15:30 Oral presentations

16:30 Coffee break

18:30 Oral presentations

19:00 GIBB members meeting

20:00 Social dinner

# Saturday 20

9:00 Plenary lecture

M. Schwarzländer University of Bonn

10:00 Oral presentations

10:30 Coffee break

II:00 Oral presentions

12:00 End of meeting and awards

## Frederic Bouillaud

University of Paris Descartes

Dr. Frédéric Bouillaud is studying the mitochondrial metabolism of the gasotransmitter  $H_2S$ . He obtained his research degree in Membrane biophysics in 1982 and in his ScD in Endocrinology in 1983. At present he is head of the team «Mitochondria Bioenergetics, Metabolism and Signaling» at the Institut Cochin, Université René Descartes, Paris.

## **Michael Duchen**

University College London

Prof. Michael Duchen is interested on interrelationships between calcium signaling, mitochondria and free radicals in cell physiology and pathophysiology. He graduated in Physiology and Medicine in 1978 from the University of Oxford and he obtained his PhD in Physiology in 1984 at University College London, where he now heads a research group in the Department of Physiology.

## Markus Schwarzländer

University of Bonn

Dr. Markus Schwarzländer, with his research group in Bonn, is studying the functional control of plant mitochondria in vivo. Markus previously held a Junior Research Fellowship at the Department of Plant Sciences, University of Oxford, where he completed his PhD after studying Chemistry and Biochemistry at the Ludwig Maximilians University in Munich.

Members of the Italian Group of Biomembranes and Bionergetics
